The Microsoft-Certified Print ERP/MIS

www.printvis.com

PrintVis is a visionary ERP / MIS system that is built-on and powered by
Microsoft Dynamics 365 Business Central, the world-renowned ERP for SMB's.

PRINTVIS AROUND THE GLOBE

PRINTVIS IS MAKING ITS MARK AROUND THE WORLD

Way back in 1997, four men in Denmark set out to create the ultimate MIS solution for companies in the graphics and printing industry. With combined backgrounds in both printing and software development, they understood such a solution would need to be built upon a proven, world-renowned ERP/MIS system in order to be fully integrable and globally accessible.

Thus PrintVis takes the mature, core ERP system of Microsoft Dynamics 365 Business Central and builds into it a complete MIS solution specifically for discrete manufacturing: the print industry vertical. This includes full General Ledger capabilities so that print companies can finally run their entire operation on one single system.

350

PrintVis now has over 350 implementations globally, and these companies range from high-security print, envelope manufacturing, label and form printing, newspapers, flexo, packaging, book production, magazine and publication manufacturing, large format printing and of course commercial printers of various sizes.
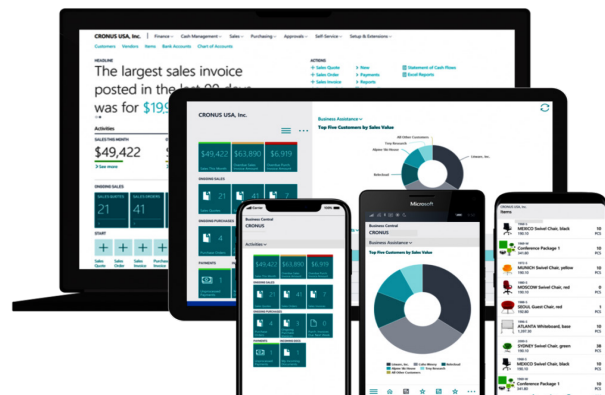

ABOUT PRINTVIS

PrintVis is the Microsoft-certified MIS built specifically for the print industry, based on Microsoft Dynamics 365 Business Central, the world-renowned ERP system for mid-market businesses. This powerful union creates a comprehensive solution to meet the most basic and advanced needs of any type or size of print company, from the first quote until the job is produced and delivered to the customer – including a complete financial package and robust business intelligence from Microsoft.

Simply put, PrintVis is the ultimate solution for the graphics industry. Built directly on and powered by Microsoft Dynamics, PrintVis handles all the tasks and processes your company requires every day. We deliver a standard core software solution, drastically reducing downtime and expensive consulting hours caused by endless customization and scope creep.

MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

WHAT IS MICROSOFT DYNAMICS 365 BUSINESS CENTRAL?

Dynamics 365 Business Central is an all-in-one business management solution that's easy to use and adapt, helping you connect your business and make smarter decisions.

Dynamics 365 Business Central is the go-to ERP system for small to medium-sized manufacturing organizations.

With Microsoft Dynamics 365 Business Central, you can manage your financials, automate and secure your supply chain, sell smarter and improve customer service, keep projects on time and under budget, optimize your operations, protect your data and support GDPR compliance, and run your business anywhere.

As a fully funtional ERP system, Microsoft Dynamics 365 Business Central can handle functions such as:

- Financial Management
- Customer Relationship Management
- Supply Chain Management
- Human Resources
- Project Management
- Manufacturing

THE PRINTVIS ADVANTAGE

PrintVis is built on and powered by Microsoft Dynamics. Our solution will fulfill the most basic and advanced needs for all tasks and processes in the administration and production of prepress, press and postpress.

In other words, you can handle every stage of your production – from the first quote until the job is printed and delivered to the customer – including invoicing and statistical data.

BENEFITS OF PRINTVIS

FLEXIBILITY

Built into the very structure of PrintVis is the ability to easily adjust and develop any process or operation to mimic how you do things, not the other way around. Thinking of building on that niche market that will give you the advantage with your customers, no need to look for another ERP/MIS system. PrintVis is already designed to handle the full gamete of print related industries all in one package.
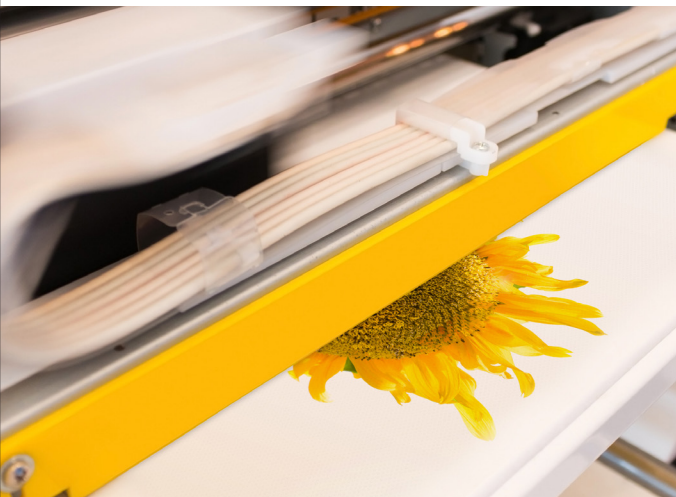

OPEN ARCHITECTURE

PrintVis recognizes that there are many companies who have developed very effective solutions that provide great value to the print industry. Rather than try to match and compete why not just provide the ability to connect to it and make the 2 systems communicate. Using Web Services built in by Microsoft, PrintVis will give you the option to create a connection to your existing or future systems when you need it.

ALL-IN-ONE SYSTEM

All components needed to create an end-toend ERP/MIS system are included. From the Lead stage, through the quote and production phases, to the end invoice and a full financial package, they are all in one software. No need to buy separate modules or stress over whether the system you buy will work with the financial software you need to buy because your MIS does not do financials.

PRINTVIS FOR YOUR BUSINESS

PrintVis offers an all-in-one solution for commercial print, covering any offset, digital or other standardized printing, with a wide range of standard pre and post-press processes covered through a simple setup.

COMMERCIAL PRINT

PrintVis has the ability for quick and accurate estimates, the ability to manage a large number of small orders, overseeing inventory and minimizing waste, dealing with sub-contractors, getting accurate job costing after the fact, communication between management and production, flexible planning and electronic job tickets to cope with constant last-minute changes.

PACKAGING

PrintVis will make your packaging company run smarter, more streamlined, and empower you to capture the data you need to optimize your business internally, which will help you to impress and retain your customers.

LABEL

Label converters finally have an affordable, flexible and complete ERP solution with full printcentric functionality to manage every stage of their business, from the first quote until the job is produced and delivered to the customer.

LARGE / WIDE FORMAT

PrintVis has ways of calculating these large formats – even if the size is larger than the machine. The user input is often types of eyelets or roll-ups, and the system will automatically find the price based on templates and formulae for this part of the industry.
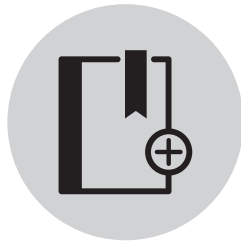

PRINTVIS FEATURES

PrintVis will fulfill the most basic and advanced needs for all tasks and processes in the administration and production of prepress, press and post-press, and PrintVis can be adapted to your specific company needs. In other words, you can handle every stage of your production – from the first quote until the job is printed and delivered to the customer – including invoicing and statistical data.

PrintVis will not only show you all the fundamentals–your customers, your schedules, your production and your workers, but also the metrics that tell you how to keep your business on track. And perhaps, where alarm bells should be ringing.

ABOUT SABRE LIMITED

At Sabre Limited, we provide expertise in manufacturing and Microsoft Dynamics Business Central.

Over two decades ago, Rob Jolliffe created Sabre Limited to support manufacturing businesses with their ERP and IT needs. In the mid-2000s, Sabre expanded to a small team of professionals.

Today, Sabre Limited employs over 25 skilled professionals who are knowledgeable about manufacturing businesses just like yours, and we have become the go-to Microsoft Dynamics 365 Business Central manufacturing partner for small to medium sized companies in North America.

Dynamics 365 Business Central is Microsoft's flagship ERP for Small and Medium Businesses. As a Business Central Manufacturing Expert partner, Sabre Limited can help guide your Dynamics 365 Training.

Sabre is recognized broadly as the leading Business Central Manufacturing Training Partner in North America. This expertise has lead to our successful and unique approach to training and implementing.

> "
>
> **What used to be silos of information are now all pulled together in one system. I had five different people with five different inventories and different pieces of information and there was not a lot of connection between the departments. Sabre and PrintVis helped to create that solution from estimating all the way through production, inventory management, and financials.**
>
> **— Tom Meilinger, President at Rydin**

> PrintVis gives you a flexible solution with a flexible business model that aligns
